

Eq. de Burgers 2D: dissipação do dipolo — (a,b) superfícies u_θ e (c--e) magnitude da velocidade $\|\mathbf{u}\|$

(a) Superfície 3D $u_\theta(x, y, 0)$ ($t = 0,0$)

(b) Superfície 3D $u_\theta(x, y, 0,5)$ ($t = 0,5$)

(c) $\|\mathbf{u}\|$ ($t = 0,0$)

(d) $\|\mathbf{u}\|$ ($t = 0,5$)

(e) $\|\mathbf{u}\|$ ($t = 1,0$)
